

1

2 ABSTRACT

3

4 This invention relates to the diagnosis and treatment of cancerous diseases,
5 particularly to the mediation of cytotoxicity of tumor cells; and most particularly to the
6 use of cancerous disease modifying antibodies (CDMAB), optionally in combination
7 with one or more chemotherapeutic agents, as a means for initiating the cytotoxic
8 response. The invention further relates to binding assays which utilize the CDMABs
9 of the instant invention.
